AutoCAD is one of the best-selling programs in the history of the computer industry and, according to Gartner, holds 15 percent of the worldwide CAD market, including mobile, web and mobile-web apps, and desktop-app software licenses. In 2017, the market size for AutoCAD software was estimated to be \$3.97 billion. AutoCAD uses the.DWG file format, which has evolved to replace and update the older.DGN file format. History of AutoCAD AutoCAD was created in 1982 by co-founder John Walker at Autodesk, Inc., a leading developer and publisher of computer-aided design (CAD) and graphical software, with offices in San Rafael, Calif. John Walker was also a co-founder of Concept One software, whose flagship products are ConceptDraw, ConceptDraw PRO, and VectorWorks. [1] AutoCAD 2.0 was released in 1990. In 1994, AutoCAD was bundled with AutoCAD Lite and was extended to native Windows and OS/2 support. AutoCAD LT was released in 1996 and can be used as a stand-alone or as a part of the AutoCAD package. From 1997 to 1999, the.DWG file format was introduced and versioning was implemented. AutoCAD 2000, released in December 1999, introduced many new features, including parametric drawing, 2D AutoPlacement, application of Boolean operations, and dimensional editing. In 2000, AutoCAD was bundled with the Microsoft Windows platform; the software is available as a download for both the Mac OS and Windows operating systems. The Windows version of AutoCAD is available in two different versions: Professional and Extended. Limitations of Autocad The Autodesk 360 product release includes a feature called "Mixed 2D/3D", which lets users create 2D and 3D drawings from a single 3D model. This allows creating 3D models for more complex projects and also lets the user create 2D drawings based on the 3D model. The creation of 2D drawings from a 3D model is not possible in earlier versions. In 2008, Autodesk announced that their limited subscription would expire at the end of September 2009. In 2013, Autodesk announced that they were discontinuing Autodesk Network Access Server (ANAS), an enterprise network protocol based on the Web Services Exchange (WS-Discovery) protocol, and replacing it with Web Services Framework for Data Exchange (WSDX). ANAS would no longer be supported starting July 1, 2015. In 2014, Autodesk changed their price model to subscription-based pricing. This made the price increase announced in 2013 "more meaningful."
